## Lifting Device

### Scissor Lift, Platform Lift and Genie Boom

This course will provide the participant with the necessary theoretical knowledge of safe lifting device operation.

#### Outline and lesson plan:

Theoretical Component – 3.5 hours – certificate issued upon successful completion

- Become familiar with legal requirements set out in the Occupational Health and Safety Act and applicable Regulations for Industrial Establishments
- Review company policy and procedure related to the various lifting devices – scissor lift, platform lift and genie boom
- Read and understand all limitations, warnings and operating procedures and operator's responsibilities for the equipment
- Learn the limitations on the kinds of surfaces for which the various lifting devices are designed to be used
- Instruction and hands on demonstration of the proper use of all controls as outlined in the Operator's Manual provided by the manufacturer for the specific make and model being used
- Review fall protection as required by company policy and procedure for lifting devices.
- Complete written assessment to determine retention of knowledge
