

Audits, Inspections and Training Since 1996

Gambit Industrial Health and Safety Consultants Inc.

Flammables and Combustibles

Accidents involving flammable materials have resulted in loss of lives and destruction of property, and community evacuations. Safe storage, handling and use of flammable materials is the focus of this course.

Participants will:

- Become familiar the Occupational Health and Safety Act, Regulations for Industrial Establishments, Ontario Fire Code, and Propane Code requirement
- Understand terms such as flash point, combustion triangle, lower and upper explosive limits, boiling point, vapour pressure, auto-ignition temperature
- Review storage requirements for flammable and combustible liquids
- Review dispensing of flammable liquids, including ventilation, and bonding and grounding requirements
- Review extinguishing media

Method of Instruction: Interactive presentation and lecture

Who Should Attend: Managers, Supervisors, Joint Health and Safety Committee Members

Course Length: 2 hours with a walk through of the workplace

- Course materials and certificates provided
