

Audits, Inspections and Training Since 1996

Gambit Industrial Health and Safety Consultants Inc.

Machine Guarding

This course will provide information on the safe guarding of equipment. Equipment that is not guarded or inadequately guarded creates a potential hazard for employees. Learn how to recognize, assess and correct guarding problems.

Participants will:

- Become familiar with Occupational Health and Safety Act, Regulations for Industrial Establishment, Pre-start Health and Safety Reviews, and the C.S.A. Standard for the "Safe Guarding for Machinery"
- Recognize types of hazards associated with machinery and equipment and processes
Assess risks of workplace hazards and adequacy of controls
Identify various types of guarding, and operating controls and their safety function
Determine how to best conduct a workplace assessment in their facilities

Method of Instruction: Brief lecture, interactive presentations, and video

Who Should Attend: Managers, Supervisors and other Employees who are responsible for guarding equipment

Course Length:

- 2 hours
